Version of Amendment to Show Marked Up Changes:

In the specification, pages 8 and 9:

FIGURE 14 depicts a flow diagram of reporting in accordance with the present invention;

and

FIGURE 15 depicts a flow diagram of generating interfaces in accordance with the present invention.[; and]

[FIGURE 16 depicts an illustration of a LExIndex graphical user interface display in accordance with the present invention.]

In the specification, paragraph 164, page 75:

[Now referring to FIGURE 16, an illustration of a LExIndex 112 graphical user interface display in accordance with the present invention is shown. The end user determines the set of concepts used in the indexing operation by creating a custom query set. A query set is a subset of the concepts in the Lexicon chosen for relevance to the indexing task to be performed. All of the Terms 124 associated with each Concept 122 form the "evidence phrases" to determine when a concept is referenced in a given document. Using the Lexicon content to construct query sets, the LExIndex tools provide a powerful mechanism to tag documents with relevant Concepts 122. Concept-based indexing is a powerful model for organizing documents around the Lexicon Concept(s) that are referred to in the document.]
